

Library Knowledge Management

Introduction:

Knowledge management is the process creating sharing and managing the knowledge and dissemination and utilization of knowledge. Knowledge is product of human experience and it can be define Defend the management creating applying and renewing knowledge of an organization including its relationship service provider. Knowledge is information data organized and way that is useful to the organization it is using communication and collaboration to improve how people do this practice. Knowledge management is essentially Defined by the need to manage knowledge and organization like the knowledge management community is in paradoxical state in that we not learning from other distress information technology with the advancement of network Technologies we now have connectivity to Bridge across isolated of knowledge sharing and a collaborative way to stimulate new ideas is not a new concept. Facility this sharing in an electronic networking fashion. Is somewhat novel knowledge around the organization? Use that knowledge to best affect both knowledge and knowledge management are difficult to define knowledge as a derivative of information knowledge is information or data organized in a way that is useful to the organization. Encodify and share knowledge valuable in the organization.

Definition:

1. "Knowledge management is the management of knowledge through Systematic sharing that can enable want to build experience and operate the need for free working of learning" by making the same repetitive mistakes - by World Bank.
2. "Information is the meaning that a human assigns to data by means of conventions used and their

presentation data that has given shape that may be considered as processed data. Data Plus the meaning which has to be a result of human action."
 (Seetharama 1999)

3. "Knowledge is the totality of the data conserved by the human and this sense. Knowledge is equal to the universe of ideas."

What is the knowledge management?

Knowledge in this context is also somewhat close you concept defined in various way by the different gurus. Thomas davenport and Lawrence prassic offer the following pragmatic description of knowledge and Organization. The explicit and systematic management of vital knowledge and of its associated process of creating organizing diffusion use and exploitation if requires organization.

Technology For Knowledge Management:

knowledge acquisition is the starting point of knowledge management libraries the application of information technology enlarge the scope of knowledge acquisition raise knowledge acquisition speed and produces knowledge acquisition cost impossible to accomplish such important tasks by using men's brains only on the model society in which the knowledge change with each passing day at will buy possible to link closely knowledge sources and knowledge work buy computer networks this constructing knowledge Network and libraries best and realization of single point informationization.

Knowledge Technology:

Desi as the word already implies the techniques and methods from the field of add or to be more specific the field of knowledge based system

remain inadequate in altering the gender inequalities unless these are supported by the nature of work they undertake being decent, lucrative, equally remunerative and secure. If illiterate women are crowding into unskilled, manual labour requiring jobs, that are low paying and hazardous to their health and safety, such a situation can barely be lauded or appreciated. Yet, if more women's labour supplies are being deployed and there exists a demand for their labour, it is of interest to consider the circumstances leading towards this employment. To some extent these may be due to heightening desperation and poverty induced compulsion that women are forced to enter paid labour markets, while at another end of the spectrum these may be outcomes of better educational attainments providing women with the opportunity to undertake jobs hitherto not accessible.

knowledge has been around for quite some time and most people know about the application of knowledge technology and the form of expert system and decision support system techniques and methods to design these kinds of system are well known the methodology for building knowledge.

Human Resources Knowledge Management :

The most important resource and knowledge economic system is the Talent progress knowledge telling competition has become the focus of market competition in the knowledge economy era in the knowledge economy. The library will attach importance to vocational training and lifelong education of library staff to raise their scientific knowledge level and liability of aquarium and innovative knowledge they also will respect the human value guide and bring into play wisdom potentialities of library staff and all around improvement of library staff qualify and positioning of the human value will become important objectives of knowledge management and library and information.

Resources Sharing and Networking :

Libraries have had a long tradition resources sharing and networking these have been greatly expanded by the Rapid development of computer networking and digital Technologies resources sharing and networking are largely the result of the full participation of all member libraries libraries must take the lead inspection and your support and important.

Knowledge Management Tools :

1. Data Mining
2. Expert System
3. Internet
4. Artificial Intelligence
5. Agent Technology
6. Mapping
7. Data Analysis
8. Intranet
9. Portal
10. Electronic Document Management
11. Workflow Management System
12. Help Desk Technologies

Library Information: Following Knowledge Management :

1. Storage Of Knowledge
2. Application Of Knowledge
3. Collection Of Knowledge
4. Distributing Of Knowledge
5. Sharing Of Knowledge
6. Indexing Of Knowledge
7. Organic Of Knowledge
8. Acquisition Of Knowledge

Knowledge management Technologies :

1. Semantic Search Engines
2. Cement Case Based Reasoning System
3. Group Decision Support System

Conclusion:

knowledge management and sharing of knowledge can help libraries with the improvement of the quality of their services as well as the creation and maintenance of learning culture knowledge management has become a powerful tool for promoting Innovation and

Realizing the creation of the knowledge innovation systems of country the library circles to meet the challenge of knowledge economy and to build the knowledge management system of libraries.
