

A STUDY ON THE SOCIAL CHANGE THROUGH NRI'S OF THAMNA VILLAGE IN ANAND DISTRICT

Mr. Govind U. Baraiya

Ph.D. Research Scholar

Dept. of Sociology

Sardar Patel University

Vallabh Vidyanagar, Anand, Gujarat

Abstract:

The Main objective of this paper is to study the Know the views of District about NRI and Know the donation given to NRI's for development of Anand District. The District is situated in the Gujarat Part of Anand. There are one of the 366 Villages in Anand District has been Selected. A Total Population 5147 in Thamana Village of Anand District. Out of 100 respondents were selected as a sample for the present study with the help of simple random sampling methods. The researcher also gave some suggestion to overcome the Social Change by the Thamana Village of Anand District.

Keyword:

Social Change, Migration, development

Introduction:

Since independence, India's villages are facing many problems. These problems are hindrance to the development of these problems. In almost all fields, the difference between 'India' (rural) and 'India' (urban) is flawed. Infrastructural development, lack of infrastructure, economic-social development in rural areas is insufficient. With the implementation of the new policy of 1991, the process of migration and urbanization has accelerated. The villages go off because of this, because villages do not have facilities like cities, as a result, the people of the village are attracted to the cities. Urbanization has been done at the expense of this policy. Which is not welcome? In fact, modernizing with urbanization and its proper development is welcome. If the facilities are available in the village, only then will the village be built and then only the distinction between 'India' and 'India' can be overcome and the development of balanced development can be boosted. The research presented has selected 100 respondents from Thama Village in Anand district. In which the primary Data is obtained from them using the interview schedule. How the NRI has played a role

in bringing about social change in the Village and the social change that has taken place in rural society has been investigated.

Significance of the study:

Sociological study can be measured in two way, through its reality and its utility. There are two main criteria for social innovation; one is the reality of research and its other practical utility. According to Good and Hatt, the goal of these two criteria is to show the current trend of general events, in the future. Today, society accepts all the facts of society through research by research. Sociology has emphasized on inspection, classification and testing since its inception. (Good & Hatt: Methods in Social Reaearch, New York McGraw - Hill Book Company Ltd, 1952). Presented study is the study of the families of the indigenous Gujarati people, especially in the state of Gujarat, the proportion of families of non-resident Gujarati is found more especially in the state Gujarat. Twenty million Indians migrated to different countries across India. Out of these, it is estimated to be the highest in the state of Gujarat. To make the economic aspects stronger, upper and middle class people migrate abroad on the basis of their qualifications and skills. According to the report of Indian Diaspora, the facilitation of changes in the villages of Gujarat is directly correlated with NRI. There is a high proportion of NRI's family members in the villages of Gujarat. In the present study, he tried to study the village of a Taluka of his caste, religion, age group and working conditions etc. So that they can be aware of the situation with him. The role of change in NRIs is a major reason for the development of the village, improvement in the medium of education and the love of his hometown. His role in leading his country as well as in gamma has been prominent.

The review of related literature pertaining to Social Change through NRI's faced by:

Devasi Bard (2009) in article, the number of countries in which the world Gujarati is spread and in which organizations they are employed. It is discussed extensively.

Brandes (1975) in Attempts to analyze the structural continuity maintained within the migration. The context of economic and cultural mobility enables the community to maintain its own sense of integrity, identity and relevance and is therefore protected.

Gujarat News, Ravipurti (2019) is 7th September. On the 9th, the first Hindu to visit England from Gujarat was Mahipatram Ruparam and he went to England on the 5th. But Shamladas Desai, a landowner and social reformer of Nadiad who went to England in the 1st before Mahipatram.

Objectives of the study:

1. Check out the social change through the role of NRI.
2. Know the views of Villagers about NRI.
3. Know the donation given to NRIs for development.

Research Question:

1. What role NRI women have in the decision making process.
2. What is The Social Change through NRI in Vallage.

Methodology:

Method Used

The Present study is purely based on field survey. Therefore, the Descriptive Survey Method was adopted for the study.

Population:

There are 5147 in Thamana Village of Anand District.

Sample:

The Present Study was undertaken in Thamana Village of Anand District. Sample Random Sampling method was used to selected the sample size for the study. From the total Population of 5147, 100 respondents have been selected from the Thamana Village of Anand District by the investigator.

Tools Used:

In order to collect data, the investigator prepared self constructed questionnaire for the present study.

Findings of the study:

1. 17% of the respondents' education is primary level. 27% of the respondents studied secondary level, 20% of the respondent's education of the Higher secondary level, 18% of the respondents' education of the graduate level, 10% of the respondents' education post-graduate level and 08% of the respondents' education studied elsewhere.

Classification of respondent family Education

Number	Education	Percentage
1	Primary	17%
2	Secondary	27%
3	Higher Secondary	20%
4	Graduate	18%
5	Post Graduate	10%
6	Any Other	08%
	Total	100%

2. 18% of the total respondents live in the UK. 15% are in the US, 16% in Africa, 13% in London, 13%

in Dubai, 14% in Canada, 5% in Israel, 6% in another country.

Which country to live in.

No.	Which country to live in.	Percentage
1.	UK	18%
2.	US	15%
3.	Africa	16%
4.	London	13%
5.	Dubai	13%
6.	Canada	14%
7.	Israel	05%

8.	Another country	06%
	Total	100%

3. 27% of the total respondents stated that they are helping to give children medicines free of cost. 47% of respondents found women to be in the delivery

of maternity treatment, while 26% of respondents reported having other immunosuppressive services. Table showing how NRIs have played a role in health facilities in the village

No.	Health facilities	Percentage
1.	give children medicines free of cost	27%
2.	delivery of maternity treatment	47%
3.	Other immunosuppressive services.	26%
	Total	100%

4. 17% of the total respondents should consume clean water. It states. 20% of the respondents should keep the roads clean, 25% of the respondents should keep the house clean, 08% of the respondents

should keep the children away from dirt, 18% of the respondents should make sewer-line arrangements and 12% of the respondents should make any other arrangements. It states.

Classification of what must be done to maintain the sanitation of the village

Number	What should be done to maintain cleanliness?	Percentage
1	Clean water consumption	17%
2	Keep the road clear	20%
3	Keeping the house clean	25%
4	To keep children out of the dirt	08%
5	Sewer-Line Management	18%
6	Make other arrangements	12%
	Total	100%

5. 23% of the respondents have improved hybrid seeds. 26% of respondents have been transformed into mechanical equipment, 18% of respondents in drip irrigation system, 08% of respondent

(Footprints) sowing equipment, 10% of respondent cultivating tractors, 15% of respondent wire fencing fence. It states.

Classification of What changed in the field of farming

N0.	What changed in the field of farming.	Percentage
1	Hybrid seeds	23%
2	Mechanical instruments	26%
3	Drip irrigation system	18%
4	Footprints	08%
5	Tractors for farming	10%
6	Wire fencing fence	15%
	Total	100%

6. 26% of the respondents have changed dress. 13% of respondents in foodstuff, 34% of respondents in modern farming equipment, 32% of respondents making modern houses, 33% of respondents have

changed to Ayurvedic medicines. It has been reported.

Classification of how foreign culture has influenced the village

No.	The influence of foreign cultures	Percentage
1	Change in dress	26%
2	In foodstuffs	31%
3	Modern farming equipment	18%
4	Build modern buildings	14%
5	Ayurvedic medicines	11%
	Total	100%

7. The respondents think that women should participate in politics. 70% of the respondents

answered yes. While 30% of the respondents appear to be refusing.

Classification of Do you think women should take part in politics?

No.	Do you think women should take part in politics?	Percentage
1	Yes	70%
2	No	30%
	Total	100%

8. 45% of the total respondent's value agriculture. While 55% of the respondents appeared to be giving up.

Who gives more importance as a business to marriage?

Table showing it

No.	importance as a business to marriage	Percentage
1	Agriculture	45%
2	Job	55%
	Total	100%

Suggestions:

- Socio-economic, cultural, political, educational, visual should be studied.
- Studies should be conducted in respect of district or state level changes.
- NRIs Research should be done in the context of physical and development other than change.
- Non-resident Indians worldwide have taken over as a rich and enterprising migrant group - in

whatever host countries they have established their base. He is known for his high-level academic qualifications, affiliation with the IT field, as a preacher for science and technical and fine entrepreneurial skills and aptitude. When this aspect combines with 'traditional Indian values', the NRI community ensures that it enjoys great peace wherever it grows. He attracts the admiration of Indians and is often viewed as

an influence, as idols. Thus, NRI has the skills to contribute to social and economic and social welfare back in India. This can be done through supporting social welfare programs run by leading NGOs.

- Did you know that despite 1.8% of the population, 5% of Britain's GDP contributes to Indian origin (PIO)? In the fourth quarter of last fiscal year, analysts noted that Indian Americans earned \$ 4 billion annually, despite a small share of the United States population. NRIs are much disciplined when it comes to sending returns. According to a surplus estimate, the amount that NRI pays in India every year is around \$ 70 billion.
- The NRI should support NGOs that have credibility and whose work speaks for it. Save the Children is one of India's leading independent child rights organizations? Its work for children has been really effective, with NGOs improving the lives of more than 6.1 million children since 2008. It is an organization that receives the respect of celebs, civil society, media and corporate. Children's work revolves around driving real and lasting change on the ground and helping communities move forward. The NGO is known for maintaining high levels of transparency in its projects, revenue and expenditures. Therefore, supporting NRIs is the right choice and, thus, helps change the lives of India's most vulnerable children.

Conclusion:

The details and role of NRI as well as issues related to social change are discussed. The village of Thame has seen a lot of change in the socio-economic areas. The NRI of this village has played a very important role in bringing about social

change in the village. According to the respondents, NRIs were found mostly for the purpose of employment abroad. The NRI appears to have arrived in his hometown in December. NRIs played a role in bringing about change in the village, roads, hospitals, crematoriums, mineral water plants, main medicines, school buildings, and so on. As well as the role of the NRI in bringing about change in a number of fields, such as business, agriculture, hygiene, health, political, marriage, economic, educational and other fields.
